SGS Report No.: MCHQD221 67-01A

Sampling method:	randomly sampling as per GB/T 6678-2003
Description of sampling:	According to GB/T 6678-2003, total 23 bags were randomly selected and opened for sampling purpose. Sample material was taken by one standard steel tube from each selected bag and all accumulated sample was finally mixed thoroughly and prepared into 2 sets of composite sample. One set of composite sample was sent to SGS Qingdao laboratory for required analysis. The other set of composite sample was sent to SGS local office for retaining for 1 month for further reference if needed.
Note:	The testing results please refer to the testing report.

CONTAINER STUFFING WITNESS AND TALLY:

Process	Value	Remark
Before stuffing, the container(s) were visually checked by SGS	Yes	empty, clean and dry condition
During stuffing, the container(s) were under SGS's continuous witness	Yes	/
After stuffing, the container(s) were sealed by SGS	Yes	/

Per SGS Tally, total 400 jumbo bags were loaded into 20 containers.

SGS Report No.: MCHQD221 167-01A

Weather condition during inspection:

November 20, 2022

Cloudy

This certificate does not release, nor certify the said vessel, containers, or materials as being "grain / organic / soil / previous cargo free". Any holder of this document is advised that information contained hereon is limited to the visual examination of the safely and readily accessible portions of the consignment only. Due to the nature of the cargo and limited access during inspection, items not recorded in the above description may be present.

As per the instruction from the principal, SGS conducted the inspection for nominated cargo, without performing vessel loading or discharging supervision. Therefore, the contents of this report/certificate only reflects our findings at the time and place of inspection, and does not refer to any cargo that was shipped from or will be received at any port.

The sole function of any seals applied by SGS is to indicate that the material bearing such seals has been inspected by SGS. Seals applied by SGS are not intended to secure material, lock the container of such material, or otherwise provide any security function. SGS does not provide security services and disclaims any liability in this respect.
