SAMPLING:

| | |
|--------------------------|--|
| Sampling method: | randomly sampling as per GB/T 6678-2003 |
| Description of sampling: | 30 bags from 1000 bags were randomly selected and opened for sampling purpose. Sample material was taken by one standard steel tube from each selected bag and all accumulated sample was finally mixed thoroughly and prepared into 2 sets of composite sample. One set of composite sample was sent to SGS Qingdao laboratory for required analysis and the other set of composite sample would be retained in SGS local office for 1 month for further reference if needed. |
| Note: | The testing results please refer to the testing report. |

CONTAINER STUFFING WITNESS AND TALLY:

| Process | Value | Remark |
|---|-------|--------------------------------|
| Before stuffing, the container(s) were visually checked by SGS | Yes | empty, clean and dry condition |
| During stuffing, the container(s) were under SGS's continuous witness | Yes | / |
| After stuffing, the container(s) were sealed by SGS | Yes | / |

Per SGS Tally, total 1000 bags were loaded into 50 containers.

Weather condition during inspection:

January 16~17, 2023 Fine

Any holder of this document is advised that information contained hereon is limited to the visual examination of the safely and readily accessible portions of the consignment only. Due to the nature of the cargo and limited access during inspection, items not recorded in the above description may be present.

This certificate does not release, nor certify the said vessel, containers, or materials as being "grain / organic / soil / previous cargo free."

As per the instruction from the principal, SGS conducted the inspection for nominated cargo, without performing vessel loading or discharging supervision. Therefore, the contents of this report/certificate only reflects our findings at the time and place of inspection, and does not refer to any cargo that was shipped from or will be received at any port.

The sole function of any seals applied by SGS is to indicate that the material bearing such seals has been inspected by SGS. Seals applied by SGS are not intended to secure material, lock the container of such material, or otherwise provide any security function. SGS does not provide security services and disclaims any liability in this respect.
